SKILLS

BACKEND
Python · Django · Java · C++ · CRUD design · Sessions and carts

WEB
Web development · CSS · Dashboards

TOOLING
Git and GitHub · GitHub Actions · Testing · Seed data · Stripe Checkout

STUDYING
DBMS · COA · Operating systems

LANGUAGES

Nepali native
English conversational
Hindi writes well, speaks basic

PROFILE

Computer engineering student in Kathmandu who builds software and web applications end to end with Python, Django, Java and C++. Completed a two-year on-the-job training in Python with Django and developed a full Django project on my own. Looking for an internship, job or freelance work with a team or client where I can build backend-focused software and keep learning.

HIGHLIGHTS

Two years of Django
On-the-job training in Python with Django.

Built end to end
A complete Django app developed solo.

Backend focus
Data models, user groups, permissions, seed data.

Tested changes
GitHub Actions runs migrations and tests on every change.

TRAINING

On-the-job training (OJT), Python with Django

2 years · Completed

Shivapuri Secondary College, Maharajgunj, Kathmandu

- Completed a two-year on-the-job training in Python with Django.
- Built Fitness Hub while learning and practising the framework.

PROJECT

Fitness Hub

2026 · Solo project

Python, Django, Stripe, GitHub Actions · github.com/Sagar-Shahi/fitness-hub

- Developed a Django fitness platform on my own, with the backend and data model at the core: profiles, goals, nutrition and progress records.
- Built editable user profiles, a dashboard with a progress chart, and goal, nutrition and progress tracking, each with full create, read, update and delete.
- Added a seeded exercise library, staff permissions through user groups, and seed commands for sample data.
- Built a store with a session-based cart and a simulated checkout, with optional Stripe test-mode payments.
- Set up a GitHub Actions workflow that runs migrations and tests on every change (29 commits).
- Next: UI polish, more tests and live payment integration.

EDUCATION

Computer engineering student

Kathmandu

Shivapuri Secondary College, Maharajgunj, Kathmandu

- Studying DBMS, COA, operating systems, Java, C++ and web development, and practising them by building projects.
